

WORK EXPERIENCE

Software Development • Internship Mar 2025 - Sep 2025
Alemen Pvt Ltd, Virtual

- Developed an AI defect detection assistant for LCD panels by combining LLMs (Claude, GPT, Gemini) with CNNs, boosting classification accuracy from 34% to 92% across 15+ defect types and significantly improving production quality.
- Constructed a dataset of 10,000+ defect images with contextual labeling & multi-defect logic, enabling robust model training.
- Optimized LLM prompts and fine-tuned CNNs, boosting complex defect detection accuracy to 70-90%.
- Implemented a production-ready pipeline using GCP AutoML and Dockerized TensorFlow Serving, integrating an ensemble LLM+CNN inference model to deliver scalable real-time batch defect predictions

AI And Data Engineering Intern • Internship Oct 2024 - Mar 2025
Joshnik AI Labs, Virtual

- Collected and enriched 50k+ professional profiles across 40+ service categories using Selenium, Crawl4AI, and Google Places API, adding reviews, ratings, and geo-coordinates to enable structured and efficient search.
- Built an AI-powered discovery chatbot using LLMs (OpenAI, Claude, Gemini) with FAISS vector search, enabling natural language query interpretation, personalized recommendations, and faster retrieval of relevant professionals.
- Delivered a real-time professional discovery platform with Google Maps integration and direct WhatsApp/DM booking.

Research Assistant – Agriculture LLM For Smart Farming • Internship Mar 2024 - Sep 2024
Atria University | Research Assistant Under Prof. Dinker Mattam, Karnataka

- Conducted research on LLM-based agricultural assistants, implementing RAG for real-time agricultural insights and RAFT fine-tuning, improving response accuracy by 30%.
- Implemented a robust RAG pipeline to enhance document retrieval, leading to more contextually relevant AI-generated responses.
- Created a judge model to evaluate RAG-based responses by fine-tuning a LLaMA model, ensuring higher response quality and reliability.
- Built an interactive UI with Streamlit, allowing users to seamlessly interact with the model and receive AI-driven farming insights.

Automated Wind Data Extraction And Visualization System - Data Science • Internship Oct 2023 - Jan 2024
Atria University, Bengaluru

- Developed an automated web scraping system using Selenium and Python to extract wind speed data from Global Wind Atlas and QGIS.
- Collaborated with a professor and an external team, and implemented a custom webpage to display the data.

Machine Learning And App Development Intern • Internship Apr 2023 - Jun 2023
Cheslab Private Limited, Bengaluru

- Mapped and prototyped wireframes for a skincare diagnosis application, creating a streamlined onboarding process that reduced user drop-off by 15% and improved overall user experience.
- Curated a high-quality dataset of 100,000 labeled and 50,000 unlabeled skin condition images with data preprocessing.
- Programmed and optimized a CNN model in Python for skin disease classification.

EDUCATION

B.Tech, Computer Science - Digital Transformation 2021 - 2025
Atria University

Percentage: 87.60%

Senior Secondary (XII), Ssc 2021
Science

Rajiv Gandhi Academy Of E Learning And Junior College Of Science

TRAININGS / CERTIFICATIONS

Natural Language Processing
Jan 2025 - Feb 2025
Coursera, Virtual

MLOps | Machine Learning Operations
Sep 2024 - Oct 2024
Coursera, Virtual

Cloud Security

May 2024 - Jun 2024

Palo Alto Networks Cybersecurity Academy, Karnataka

PORTFOLIO

[GitHub link ↗](#)

[Portfolio link ↗](#)

PROJECTS

New York City Taxi Trip Duration

Nov 2024 - Dec 2024

- Built a trip duration prediction model using ML techniques, optimizing distance, weather, traffic, and passenger density features, reducing RMSE from 600s (~10 mins) to 450s (~7.5 mins).
- Created a real-time dashboard using Streamlit and Flask API for trip duration estimation and visualization, improving accessibility and user interaction.

Audio Caption Generation System for the Visually Impaired

Sep 2023 - Oct 2023

- Developed a real-time platform for visually impaired users, generating spoken image descriptions using VGG-16 and Transformer model, achieving 87% accuracy on benchmark captioning datasets.
- Integrated Pyttsx3 for text-to-speech conversion and deployed a Flask-based API for real-time accessibility support.

Handwritten Digit Recognition

May 2023 - Jun 2023

Analyzed ML classification algorithms with MNIST dataset to optimize digit representation and boost accuracy. Utilized Python and ML libraries for data preprocessing, re-centering exploration, and algorithm performance evaluation for effective digit classification.

Price Prediction of Players in Upcoming IPL Auction

Jan 2023 - Feb 2023

Performed price prediction analysis for IPL auction players, adept in data collection and statistical analysis techniques.

Music recommendations based on Facial Emotion Recognition

Jan 2024 - Feb 2024

- Engineered a music recommendation system using facial emotion recognition with Streamlit UI, achieving 85% accuracy in mood detection with the FER-2013 dataset, and integrated with Spotify API for personalized playlists.

Stock Market Prediction (Offline and Real-Time Data Analytics)

Jul 2023 - Aug 2023

Developed LSTM models to predict stock fluctuations for Tata Steel and Reliance.bo, optimizing trading strategy with offline and real-time data insights.

Data analysis of the Population of India and IMDB top 100 movies

Mar 2023 - Apr 2023

Used R to analyze Kaggle datasets on India's Population and IMDB's top 100 movies, utilizing visualization techniques to extract insights and communicate findings effectively.

SKILLS

- | | | |
|-------------------------------------|--------------------|-------------------------------------|
| • Python | • Data Science | • Data Analytics |
| • Database Management System (DBMS) | • Data Structures | • Git |
| • GitHub | • Java | • JavaScript |
| • Linear Programming | • Machine Learning | • Natural Language Processing (NLP) |
| • Neural Networks | • R Programming | • HTML |
| • Amazon Web Services (AWS) | • Content Writing | • English Proficiency (Spoken) |
| • English Proficiency (Written) | • Blogging | • Search Engine Optimization (SEO) |
| • Computer Vision | • SQL | • Arduino |
| • Flask | • FastAPI | • Streamlit |
| • Selenium | • Tkinter | • BeautifulSoup |
| • OpenCV | • Plotly | • TensorFlow |
| • Keras | • scikit-learn | • NumPy |

- Pandas
- Supervised Learning
- MySQL
- Matplotlib
- Unsupervised Learning
- Cloud Computing
- Seaborn
- Hyperparameter Tuning

EXTRA CURRICULAR ACTIVITIES

- Led a team of 10 volunteers to plan and conduct events for interschool competitions.
- Led the school cricket team as a vice-captain, contributing to leading the team to victory.

ADDITIONAL DETAILS

- Cricket Tournaments Served as vice-captain of the school cricket team, contributing to leading the team to victory.
- MUN and SOF Olympiad Participated in the MUN conference in Pune and various Olympiads in mathematics, science, and English, achieving notable success with gold and bronze medals in mathematics.
- Interschool and Intercollege Competitions Received awards and certificates in interschool and intercollege competitions spanning football, cricket, quiz, chess, and carrom.
